Vidit Dhull, Data Engineer

vidit.dh@gmail.com | Portfolio: viditdhull.github.io | +91 9355512200 | LinkedIn: linkedin/viditdhull/ | Bengaluru, India

PROFESSIONAL SUMMARY

- **Data Engineer** with **5+ years** of experience building **scalable data platforms** and **real-time streaming pipelines** using Spark, Kafka, and both **open-source** and **Azure-based data ecosystems**. Experienced in designing Medallion Delta Lakehouse architectures, optimizing large-scale ETL pipelines, and delivering **high-throughput event-driven systems** processing TB-scale telemetry data for analytics and operational insights.
- **Strong ownership mindset** with hands-on **leadership in data platform architecture**, performance optimization, and reusable engineering standards.

WORK AUTHORIZATION

- Non-EU. Requires employer sponsorship (Highly Skilled Migrant / EU Blue Card). Ready to relocate to Netherlands.
- **Languages: English** - Fluent/Professional; **Hindi** - Native; **Dutch** - A1 (learning)

EXPERIENCE

Data Engineer, Alstom **March 2023 - Present**

- Worked on development of **Dialogs**, a company-wide log analytics platform for train telemetry subsystems built from POC to production on a **Medallion lakehouse**; unified heterogeneous logs and delivered **Power BI dashboards** for KPI monitoring, log exploration, and pattern analysis. (Processes **5 million events** and **TB scale** data daily)
- **Owned end-to-end** delivery of an **auto-trigger, machine-to-machine ingestion** framework in **Microsoft Fabric** (Blob → Event stream/hub → Lakehouse/Warehouse/Eventhouse), supporting 1..N file drops and separating UI vs automated uploads; improved ingestion responsiveness and reduced ops overhead.
- **Led architecture + implementation** of **signature/pattern search** on telemetry using **PySpark**, enabling fast matching of event sequences to known signatures; reduced investigation/triage time by **50%** for recurring issues.
- **Designed** and **delivered** partial-run handling (late/partial/complete arrivals) with **idempotent merges** + governance rules, cutting data inconsistencies and manual rework by **60%** and improving KPI reliability.
- Built standardized Medallion (Bronze/Silver/Gold) **Delta pipelines** + **semantic models** for multi-tenant onboarding; reduced onboarding/troubleshooting cycle from **2 months to less than 2 weeks**.
- Improved performance and cost-efficiency by optimizing **Spark workloads** (partitioning, broadcast joins, shuffle reduction) and table layout (partitioning/indexing); cut backfill runtime by **50%** and improved query latency by **90%**.
- **Technical owner** for CCP2 (train telemetry subsystem) stream, driving architectural decisions, aligning engineering priorities with product requirements, and mentoring contributors on platform standards.

Software Engineer, Nextsavy Technologies **September 2020 - August 2022**

- **Scraped** and structured **50K+ records** from multiple public websites using **BeautifulSoup and Python**, improving automated data availability by 45% and reducing manual collection effort by 60%.
- **Built and deployed FastAPI REST** services to serve ML model predictions, **decreasing response time by 50%** compared to batch execution and enabling **real-time inference** for client applications.

SKILLS

- **Programming Languages:** Python, SQL, PySpark
- **Tech Stack:** Apache Spark, Apache Airflow, Kafka, Batch and Real-time processing, Power BI
- **Architecture:** Medallion/Lakehouse Architecture, Star Schema, ELT/ETL, Indexing/Partition strategy, Dimensional Modeling
- **Cloud & Data Platforms:** Microsoft Fabric (Lakehouse, Eventhouse/KQL), ADLS Gen2, Azure Data Factory (ADF), Azure Synapse, Azure Functions, Databricks, OneLake/Delta Lake concepts, Azure Storage/Blob, Events stream
- **Data Quality & Governance:** Validation Automation, Logging Frameworks, KPI Modeling, RBAC, Access Control
- **Collaboration & Version Control:** GitLab, Agile/Scrum, CI/CD, Azure Devops, Code Reviews, Stakeholder Collaboration
- **Additional Skills:** Requirement Analysis, FinOps Awareness, Parquet/Tabular Data Formats, Partitioning, Indexing

CERTIFICATIONS

- **DP-700:** Fabric Data Engineer Associate (**Microsoft**), September 2025
- **DP-203:** Azure Data Engineer Associate (**Microsoft**), June 2024
- **DP-900:** Azure Data Fundamentals (**Microsoft**), April 2024
- **IBM:** Data Engineering Specialization, October 2023

EDUCATION

- **PG-Diploma, Big Data Analytics (Ranked 1st)** - CDAC Bengaluru | (September 2022 - March 2023)
- **B. Tech in Computer Science** - UIET-MDU, Haryana | (July 2018 - July 2022)
