Vidit Dhull | Data Engineer

Email: vidit.dh@gmail.com | **Mobile**: +91 9355512200 | **Portfolio**: viditdhull.github.io | **LinkedIn**: linkedin.com/in/viditdhull
Location: Bengaluru, India | Open to EU Relocation | Requires employer-sponsored work authorisation

PROFESSIONAL SUMMARY

- **Data Engineer** with nearly **4 years of experience** delivering production lakehouse platforms and AI applications over enterprise data. Built **Microsoft Fabric** and Azure pipelines processing **30+ GB of daily data ingestion** into a **15+ TB** Medallion Lakehouse, alongside RAG investigation agents and LangGraph workflows operating on terabyte-scale telemetry. Strong in Python, PySpark, SQL, Kafka, Airflow.

EXPERIENCE

Data Engineer | Alstom — March 2023 – Present

Project: Dialogs (Diagnostics of Logs) | Train Telemetry Analytics & AI Platform | October 2024 – Present

- Took **Dialogs**, a company-wide train telemetry analytics platform, from POC to production on a Medallion lakehouse, unifying heterogeneous logs and delivering dashboards for KPI monitoring, log exploration, and pattern analysis; reduced recurring analysis cycles from **8 weeks to under 5 working days.**
- Implemented Microsoft Fabric ingestion pipelines using Apache Airflow, Kafka, and Polars, processing **30+ GB daily across 10+ log types** (HTML, XCP, Excel, XML, XZ, JSON, API); reduced ingestion-related incidents from 10 per month to 3 per month by implementing partial-arrival handling and idempotent merges.
- Modernized **20+ SQL stored procedures** into reusable PySpark notebooks**,** enabling complex distributed transformations; optimized partitioning, joins, shuffles, and data skew, cutting pipeline runtime from **3.5 hours to approximately 1 hour.**
- Owned technical delivery for CCP2 Product, translating requirements and reviewing code; engineered **PySpark** telemetry signature search, reducing recurring-issue investigation time by **50%**.
- Architected and deployed a Kubernetes-based RAG agent using LibreChat, LangChain, and MCP, with retrieval evaluation across **7 products**, cutting analysis time by **65%**.
- Built LangGraph multi-agent workflows generating Fabric PySpark notebooks for 11 Gold Layer KPIs, reducing delivery from **2 weeks to 2 days**.

Project: DMS (Digital Mobility Solutions) | Mobility Data Platform | March 2023 – September 2024

- Built Databricks pipelines for mobility data using ADF, PySpark, Delta Lake, incremental loads, schema enforcement, and bad-record quarantine workflows, reducing reprocessing overhead by **60%**.
- Developed dbt-based Snowflake dimensional marts with fact and dimensional modeling, SCD handling, clustering, RBAC, reducing BI query runtime **from 12 to 6 seconds** for revenue, demand, and utilization reporting.

SKILLS

- **Programming**: Python, SQL, PySpark
- **Data Processing**: Apache Spark, Kafka, Airflow, dbt, Polars, REST APIs
- **Cloud and Platforms**: Microsoft Fabric, Databricks, ADF, Snowflake, Event Hubs
- **Storage and Modeling**: Delta Lake, Lakehouse, Dimensional Modeling, Star Schema, SCD, ETL and ELT
- **Quality & Optimization**: Schema Enforcement, Idempotent Processing, RBAC, Data-Skew Handling
- **DevOps**: Docker, Kubernetes, GitLab CI/CD
- **Applied AI**: LangChain, LangGraph, RAG, MCP, LibreChat

CERTIFICATIONS

- **IBM:** AI-Native Data Engineering, October 2026
- **DP-700:** Fabric Data Engineer Associate (**Microsoft**), September 2025
- **DP-203:** Azure Data Engineer Associate (**Microsoft**), June 2024
- **DP-900:** Azure Data Fundamentals (**Microsoft**), April 2024
- **IBM:** Data Engineering Specialization, October 2023

EDUCATION

- **Postgraduate Diploma in Big Data Analytics (Ranked 1st)** - CDAC Bengaluru — **Sept 2022 - March 2023**
- **Bachelor of Technology in Computer Science** - UIET-MDU, Haryana — **July 2018 - July 2022**
